 - I. **Claims 8, 10 and 13** are drawn to a controller for displaying the image corresponding to control data; the image identifying the position of a listener, classified in class 700, subclass 94. The claims do not speak to virtual processing.
 - II. **Claim 15** is drawn to an audio system for virtual processing, classified in class 381, subclass 310.
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
